\$MCU WHITEPAPER

1. About

We are a group of 5 people who are absolute Marvel fans and have a solid IT background. All of us give the \$MCU everything we can to make it great. It is our personal concern to make this coin the top meme coin in 2024. He should become as well-known and famous as his subject, the heroes of all of us from the Marvel Universe.

The \$MCU Coin honors all the heroes from the Marvel Universe.

Our heroes are role models for everyone, whether small, large, young or old. Billions of people worldwide know and love the heroes from the Marvel universe.

That's why we decided to set up the fan project \$MCU - Marvel Coin Universe to give all Marvel fans the opportunity to build financial independence by investing in this meme coin.

Our coin will unite a strong community behind it and become one of the TOP meme coins! Because a meme coin is only as strong as its community wants it to be.

We firmly believe that the community wants it and will make the coin as famous and strong as our heroes are.

Don't miss your chance and invest today.

4. Presale / Claim

The presale starts on March 1st, 2024 and will have a total of five stages. Each stage has 50,000,000 (10%) coins and runs until it is sold out. We expect that each stage will take no longer than 14 days to sell out.

The prices of the stages are: \$0,005 - \$0,006 - \$0,007 - \$0,008 and \$0,009. The launch price will be \$0,01.

This means that if you bought in the first stage, you have already doubled your investment at launch!

All proceeds from the presale will be spent on advertising, listings, reserves and expansions for the coin.

After the presale and with the launch on Uniswap.org (DEX), you will be able to claim your \$MCU coins directly from our website.

5. Staking / Bonus

During the presale you have the opportunity to stake your \$MCU coins. If you do this, you will not be able to access your coins immediately after the launch, but will have to wait until your holding period has expired. This makes sense so that it is not sold immediately after the launch and the price falls. We will reward you with a 25% return on your coins per year (APR). You have the option to extend your staking to 1, 3 and 6 months. The longer you hold it like this, the more return you get.

For buyers who invest more than \$5,000 in \$MCU in the presale, we will provide a free NFT upon request. You can then sell this again later. These NFTs are limited and differ from the normal NFTs that we will gradually release to match the \$MCU Coin.

We will keep a close eye on the community! We know that the community is the most important thing in a meme coin and will therefore reward particularly active members who do a lot for the \$MCU with free \$MCU coins! There will also be free \$MCU coins at community events. But more on that in the events themselves.

6. Prices / Taxes

We start the presale with \$0.005 and the price increases by \$0.001 with each stage.

Stage 1 = \$0.005

Stage 2 = \$0.006

Stage 3 = \$0.007

Stage 4 = \$0.008

Stage 5 = \$0.009

Launch = \$0.01

After the launch, we expect a rapid price increase through the listing on Uniswap.org (DEX)

The price will be subject to strong fluctuations, which is completely normal in the crypto market. Just keep calm and hold on! We hope that the price will increase 1000x within 12 months.

In order to make day trading less attractive and also to finance income for new listings and advertising, we charge a fee of 3% on every purchase and sale.

We don't do this to harm you or enrich ourselves, but to secure the coin and have financial resources for ongoing costs.
